Projects

Non-Profit Seeker

Hackathon (Hack @Davidson) award winning project "Technology for Best Use" that involves data wrangling from Form 990's inorder to easily show information about nonprofits through a search navigation. Project also used a logarithmic algorithm to rate each nonprofit based on contributions and total money spent using python.

To-Do List Tracker

Using Html, CSS, Javascript, and ReactJS was able to make a To-Do List with a vibrant User Interface that allows a user to add, delete, or edit items within the to-do list.This project was in effort to learn more about Reacts framework and how to use React components.

E-Commerce Website

Website built using HTML, Bootstrap, and Javascript that allows users to navigate through a home page, shop page, and about page as well as add items to a cart with a checkout feature.

Experience

Automation Engineering Intern   **October 2022- December 2022**
Power Relay Solutions|Charlotte, NC

In charge of programming relays and setting microprocessor-based protective relays for electric power generation, transmission lines, substations, distribution network, and industrial power systems all across the United States.
